- Assets related to the filer's spouse's employment, business activities, other income-generating activities (1) that ended the reporting period with a value greater than \$1,000 or (2) from which more than \$200 in income was received during the reporting period (e.g., equity in business or partnership, stock options, retirement plans/accounts and their underlying holdings as appropriate, deferred compensation, and intellectual property, such as book deals and patents)

Additional exceptions apply.

Form 278e - PART 2 GENERAL NOTES

In reviewing the filer's Form 278e, please note the following:

1. As part of their investment strategy, many of the Cerberus Funds own portfolios of asset-backed securities (“Bonds”) that are issued by securitization trusts or similar financing vehicles (“**Securitization Trusts**”). These Bonds are backed by very large portfolios of residential mortgages or other loans which are owned by the Securitization Trusts’ independent trustees (who have engaged servicers to deal with the underlying borrowers). The Bonds themselves (which were issued in private placements and can be sold subject to the Rule 144A exemption from registration and certain contractual limitations) are the assets that are owned by the relevant Fund. Throughout Part 2, we have identified each Securitization Trust that has issued the Bonds it holds, and in the related End Note we have identified the specific Bonds that it owns from such Securitization Trust. (See for example, Line 1.2.1.)
2. As part of their investment strategy, many of the Cerberus Funds have invested in an operating business that originates, purchases and securitizes a large volume of residential mortgage loans in the United Kingdom (the “**UK Residential Mortgage and Mortgage Backed Securities Business**”). Cerberus owns the licensed and regulated platforms that originated these loans (Capital Home Loans Ltd. and Landmark Mortgages Limited), both of which were acquired as active businesses, as well as Bonds issued by Securitization Trusts that have purchased and now own the underlying mortgage loans. As at December 31, 2024, there were approximately 38,160 such loans in the UK Residential Mortgage and Mortgage Backed Securities Business. Throughout Part 2, we have identified each such Securitization Trust that has issued the Bonds it holds, and in the related End Note we have identified the specific Bonds that it owns from that Securitization Trust. In addition, we have indicated any other investments by each Fund that are part of the UK Residential Mortgage and Mortgage Backed Securities Business.
3. As part of their investment strategy, many of the Cerberus Funds have invested in a European real estate business that owned 63,438 real estate properties located throughout Europe as at December 31, 2024 (the “**European Real Estate Business**”). Of this total, approximately 66,907 properties are located in Spain, and most of them (60,220 properties) are held in operating companies that are minority-owned by the major Spanish banks (BBVA, Banco Sabadell, and Santander) who originated the loans that ultimately led to foreclosure on real estate collateral (REO). These Spanish REO purchases were accompanied by the European Real Estate Business also taking over the operations and employees that had managed these REO assets for the banks. In addition, Cerberus recruited a team now known as Cerberus European Servicing and employing approximately 65 individuals, which works with the teams brought over from the banks to manage the assets of the European Real Estate Business. Other properties comprising the European Real Estate Business are located in: the United Kingdom (349 properties) and Portugal (353 properties), as well as other European jurisdictions with fewer properties (Italy, Germany, Austria, the

Netherlands, Romania). 132 of the assets comprising the European Real Estate Business are part of the pan-European “SIRE” investment, which is another operating business with 18 employees, which is building a cold storage business in Europe. Throughout Part 2, we have clearly indicated investments by each Fund that are part of the European Real Estate Business, and we have included information about the aggregate value of the Cerberus Funds’ and the filer’s interest in the relevant real estate assets comprising European Real Estate Business.

4. As part of their investment strategy, many of the Cerberus Funds have invested in a large-scale operating business that owns and manages non-performing loans purchased from financial institutions (the “**European NPL Business**”). The European NPL Business as at December 31, 2024 consists of 43,360 loans throughout Europe (including the United Kingdom, the Republic of Ireland, Spain, Portugal, Italy and Cyprus). The non-performing loans are primarily residential mortgage loans, but also include non-performing commercial loans and consumer loans. The European NPL Business has been operated since inception (over 10 years ago) as a combined business with the European Real Estate Business described above, with the same large team at Cerberus European Servicing assisting in the management of this business. Throughout Part 2, we have indicated investments by each Fund that are part of the European NPL Business, and we have included information about the aggregate value of the Cerberus Funds’ and the filer’s interest in the relevant loan assets that are part of the European NPL Business.
5. In the ordinary course of business, each Cerberus fund purchases or executes a variety of hedging and financing transactions, typically of short-term duration, related to the financing and risk management of the Fund’s underlying investments. This includes, for example, currency hedges, interest rate call options, put options, credit default and interest rate swaps, swaptions, and repo and reverse repo transactions. We have described these assets as single category for each Fund under the description “**Hedging, Finance, Risk Management & Other Assets**” (see for example Line 1.2.120), and have stated, with respect to the filer, the combined Value and Income arising from these assets that is attributable to him. In response to comments from the OGE staff, we are submitting a spreadsheet attachment to the Form 278e that will provide additional detail concerning these positions.
6. Throughout Part 2, we have reported, for certain Cerberus Funds, underlying assets that do not appear to meet either the applicable Value or Income threshold. We have done so on the recommendation of regulatory counsel, because multiple Funds often participate in the same investment. In these cases, there are other Funds that have invested in the same assets and do meet the disclosure threshold. By including this detail, we have attempted to show more transparently the relationship of the filer’s investments across all the Cerberus Funds.
7. In Part 2, we have referenced each Fund where the filer participates in a carried interest or incentive allocation and have identified the entity through which he receives such interest. While both are forms of performance-based compensation, “carried interest” generally refers to a share of distributable proceeds, and an “incentive allocation” is a reallocation of realized

and unrealized profits. These arrangements are addressed in more detail in Part 3. We note that the Value or Income attributable to any carried interest or incentive allocation is included in the Value and Income amounts attributable to the filer in respect of each Fund's underlying assets.

8. Certain Funds referenced in Part 2 have associated Alternative Investment Vehicles (AIVs) that are typically organized in a different jurisdiction than the referenced Fund. For various reasons, certain investments may be completed by an AIV rather than the referenced Fund; however, the Fund and any associated AIVs have ultimate investor ownership that is generally identical, and the filer's carried interest or other compensation is generally not affected by whether an investment is completed by the referenced Fund or its AIV, as the performance across the reference Fund and such AIV is netted. As a result, the AIV assets are included beneath the applicable Part 2 line cross-reference (in parentheses below). The following list matches each Fund referenced in Part 2 to its associated AIV(s), with AIVs listed below the associated reference Funds:

These accounting entries do not represent “real” assets, and do not involve any counterparties, but we have included them in the disclosure because they represent additional value to the filer.

If any Description set forth in Part 2 of OGE Form 278(e) contains “Miscellaneous Liabilities and Expense Items” (e.g., item 1.2.83), the underlying fund holds one or more of the following positions: (a) accounting entries that represent certain valuation components of SPVS that are held within the FirstKey Homes business (which is comprised of an integrated owner, operator and manager of approximately 52,800 single family homes in the Southeast and Southwest parts of the United States) (see item 1.2.43), and are necessary in order for the relevant components of the First Key Homes business to be reflected at fair value for accounting purposes (for example, this category would include a fair value adjustment of debts & balance sheet assets within a lower level SPV); (b) valuation components for accounting purposes of CHL to accurately record the fair value of assets and SPVs in its structure; and (c) balance sheet liabilities of CHL, which is part of the UK Residential Mortgage and
